

VACUUM SOLUTIONS FOR *TOBACCO PROCESSING*

Capture tobacco residues from processing directly at the source and on conveyor belts.

- ✔ Delfin vacuum cleaners have a large collection capacity, high mobility, and compact dimensions for installation on board the machine.

Use the suction of the vacuum cleaner to keep the leaves open to insert the shredded tobacco during final processing.

- ✔ Use the fixed base vacuum cleaner to feed the micro-perforated rubber surface to keep the tobacco leaf open.

Ensure excellent cleanliness and maintenance of the entire production department and machines.

- ✔ Our solutions allow cleaning operations to be carried out efficiently and quickly.

DELFIN VACUUM SOLUTIONS

VACUUM CLEANERS

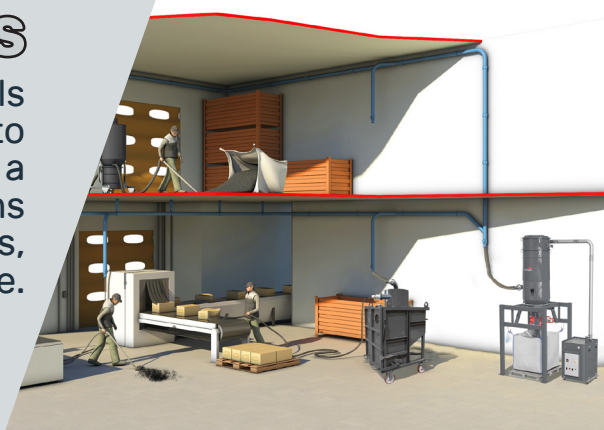

Delfin industrial vacuum cleaners are the best solution for removing dust and/or processing residues from any type of work environment, guaranteeing maximum efficiency and safety in any production or work area.

CENTRALIZED SYSTEMS

A centralized vacuum system ensures that materials are removed and transported from one area to another, and accumulated and discharged at a chosen point. Delfin's centralized vacuum systems allow material to be vacuumed over large distances, or in several places at once.
