

## INTEGRATED VACUUM SOLUTIONS ON **PACKAGING MACHINES**

Catch scrap directly at the source and avoid production interruptions.

- ✔ Delfin vacuum cleaners have a large collection capacity, high mobility and compact dimensions for installation onboard the machine.

Remove air and excess residue before sealing your product.

- ✔ DBF vacuum cleaners guarantee high quality standards for your products during the closing and capping phase.

Extract product residues directly from the production line during the Flow pack packaging process.

- ✔ Our solutions allow you to eliminate dust while preserving the quality of the final product.

## VACUUM CLEANERS

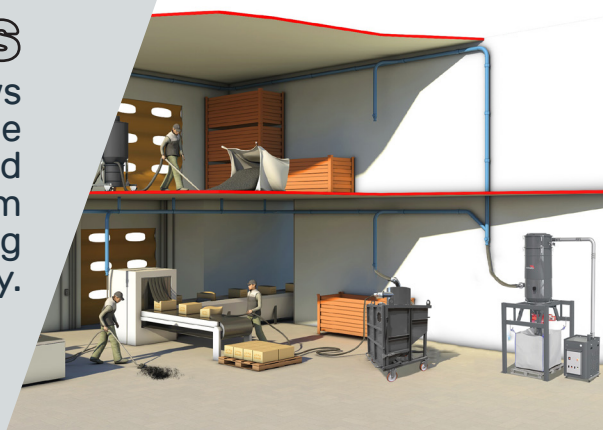

Delfin's industrial vacuum cleaners are the best solution for removing dust and/or processing waste from any type of working environment, guaranteeing maximum efficiency and safety in any production or working area.

## CENTRALIZED SOLUTIONS

A centralised vacuum cleaner system allows material to be removed and transported from one area to another and accumulated and discharged at a chosen point. Delfin's centralised vacuum systems allow material to be vacuumed over long distances, or at several points simultaneously.
