

XTRACTOR RANGE

**Concrete Grinding &
Floor preparation Dust Extractors**

XTRACTOR

Delfin's **Xtractor range of vacuums** is specifically designed for application in the floor preparation, building and construction industries. It is today the preferred choice of thousands of contractors and OEMs.

Floor preparation machines such as cement and concrete grinders, scarifiers, edgers, shotblasters, power tools, create a lot of fine dust that needs to be removed quickly and effectively, over long periods of time and in tough working conditions.

Delfin's **Xtractor range** is the answer to this demand, providing sturdy machines 100% steel built, with high filtration capacity, designed for a continuous and effective extraction of the dust and debris.

Additional features such as HEPA certified filters, innovative filter cleaning systems and collection systems such as the **Longopac™** continuous dust bagging system, guarantee a complete removal of the finest dust particles and their safe disposal, thus protecting the operator and the environment from potential contact with harmful dust.

Delfin's Xtractor vacuums can be provided with a full range of dedicated accessories and options (pre-separators to increase filter efficiency, sturdy steel floor cleaning brushes, antistatic heavy duty hoses, PTFE coated filters) that increase their efficiency.

SINGLE-THREE PHASE XTRACTORS

- > Single-phase industrial vacuums from 1.150 to 3.450 Watt
- > Three-phase industrial vacuums from 2,2 to 25 kW
- > 100% steel construction
- > High Surface Filters for fine dust
- > Manual or automatic filter cleaning systems
- > Filter clogging detection
- > Longopac™ safe bagging system

Grinding

Scarifying

Shot Blasting

Power tools

OPTIONAL FEATURES

> German TÜV SÜD certificate for Asbestos

> PTFE filter

> Power tool connection

> GPL / Propane powered vacuums

WIDE RANGE OF SEPARATORS

> Antistatic hoses

> Floor cleaning accessories

> Sliding damper for Dustop filter cleaning

COMPLETE RANGE OF ACCESSORIES
