## MTL 45 BT - INDUSTRIAL SINGLE PHASE

BUILDING AND CONSTRUCTION

CLEANING CONTRACTORS

- ✓ Largest surface filter in its category
- ✓ Integrated filter cleaning system
- ✓ Extractable collection container with optional use of disposable bags
- ✓ Compact and mobile

- ✓ Easy to clean and to maintain
- ✓ Accessory kit included
- ✓ Cordless and battery-powered vacuum cleaner

# SUCTION UNIT

The vacuum unit is equipped with an innovative battery-powered 24V DC electric motor, which allows use without any power connection via cable. The battery autonomy ensures that the vacuum cleaner can be used for 2/3 hours without needing a continuous power supply. The battery recharge time is complete in 390 minutes. Cleaning and maintenance operations are thus simplified thanks to cable-free movement in any department.

The large surface star filter, located inside the filter stainsteel chamber, is made of polyester and provides high resistance against clogging and passage of fine dust. It is possible to clean the filter using an integrated mechanical system: an external lever shakes the filter vertically and enables to clean the filter thoroughly and safely, maintaining constant suction performance and preventing any dispersion of dust in the environment.

# Source Collection Unit

The vacuum is assembled onto a sturdy steel chassis, and provided with industrial quality wheels , that make it suitable for mobile service even when used on rough surfaces. The detachable AISI 304 steel collection tank has a quick release system for the rapid disposal of the vacuumed material.
